Will present

**Access Management Design Standards for Entrances and Intersections:
Principal & Minor Arterials, Collectors and Local Streets.**

By:

Anwar M. Maharmeh, P.E.

At Virginia Department of Transportation

Mr. Maharmeh is a graduate of the University of Arizona in 1985 with a Bachelor of Science degree in Civil Engineering, 30 years experience in private and government sector, specializing in Land development, Material and Quality Control and Quality assurance in Virginia Department of Transportation.

Presentation Core Subject is:

- Access Management Regulations & Standards: Minor Arterials, Collectors, Local Streets
- Key Changes to 24VAC30-73 Regulations Based on Public Comments
- Entrance location to be considered during rezoning, site plan, subdivision plat review
- All entrance spacing exceptions/exemptions consolidated into one section
- Better explanation of the rules/procedures for requesting spacing exceptions
- Provisions dealing with existing entrances easier to find
- Entrances locations shown on site plans/substandard. plats that are submitted by the locality to and received by VDOT prior to October 14 are exempt from spacing standards
- Key Changes to Appendix G Standards Based on Public Comments
- Reduced urban & rural collector entrance/intersection spacing standards
- New spacing standards for roundabouts
- Expanded sections on pedestrians, bicyclists, and roundabouts standards
- New low volume commercial entrance design: reduce construction cost
- More detailed explanations of standards
